02/18/2009		ELECTRONIC		

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

gbpatent@gbpatent.com
pto@gbpatent.com

Office Action Summary

Application No.

10/697,560

Applicant(s)

GRAFENAUER, THOMAS

Examiner

LAWRENCE D. FERGUSON

Art Unit

1794

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 and 16-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 and 16-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/5508)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

1. In view of the Appeal Brief filed on October 14, 2008, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below.

Claim Rejections – 35 USC § 103(a)

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 8-9 and 16-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson (U.S. 6,449,918).

Nelson discloses a panel having a reinforcing substrate (support board) having a top wear surface and a bottom surface with a backing layer surface attached to the substrate (column 11, lines 41-46 and column 15, line 63 through column 16, line 2) where the base member is made from wood based materials (column 16, lines 30-47) where it is expected for the woodbased particle materials to be glued or binded together. The top wear surface of the panels comprises decorative laminates prepared by heat and pressure consolidation, which have an embossed simulated wood grain finish (column 2, lines 3-15) where water is used to penetrate from the underside of the flooring panel (column 14, lines 16-20). Nelson further discloses the panels included recesses (column 20, lines 64-65).

Paragraphs 0015-0016 of the instant specification discloses the density of on the top side of a support board is lower than the density of the underside when the top surface is stamped and water is applied to the underside prior to the material being heated and compressed. Because Nelson discloses the top side is embossed (stamped) and the underside has water penetrated prior to the material being heated and compressed, it is expected for the top side to have a structured surface, where the density on the top side of the support board is lower than the density of the support board on the underside, with the density distribution through a thickness of the board is substantially parabolic in shape, as in claims 1, 8 and 16-21. In claim 19, the phrase, "comprises a structure composed of a stamping" introduces a process limitation to the

product claim. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” In *re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966. Further, process limitations are given no patentable weight in product claims.

Although Nelson does not teach the gluing factor amount or density of the layers as in claims 2-3 and 9, density and gluing factor are optimizable. In the absence of any evidence to the contrary, it would have been obvious to one of ordinary skill in the art to optimize the layers of the panel because discovering the optimum or workable range involves only routine skill in the art. The density and gluing factor directly affects the durability of the panel. *In re Aller* 105 USPQ 233 and see *In re Boesch*, 617 USPQ 215. Additionally, there is also no clear teaching away from the density and gluing factor of the panel by Nelson, as the reference does not exclude any values for the density or gluing factor.

Claim Rejections – 35 USC § 103(a)

5. Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson (U.S. 6,449,918) in view of Clausi (U.S. 5,855,832).

Nelson is relied on for instant claim 1 as above. Nelson does not disclose the panel comprising UF and isocyanates, as in claims 4-7. Clausi teaches a compressed wood fiber material having a binding agent including urea formaldehyde (UF) and

isocyanate (column 1, lines 12-20, column 13, lines 35-40 and column 14, lines 37-39). Moriau and Clausi are both related to compressed woodbased fiber material. It would have been obvious to one of ordinary skill in the art for the adhesive material of Nelson to comprise UF and isocyanate because Clausi teaches these materials are conventional binding (adhesive) materials. Although neither reference teaches the gluing factor for isocyanates, gluing factors are optimizable. In the absence of any evidence to the contrary, it would have been obvious to one of ordinary skill in the art to optimize the core (support board) of the panel because discovering the optimum or workable range involves only routine skill in the art. The gluing factor directly affects the durability of the panel. *In re Aller* 105 USPQ 233 and see *In re Boesch*, 617 USPQ 215.

Response to Arguments

6. Applicant's arguments regarding the rejection made under 35 U.S.C. 103(a) as being unpatentable over Moriau et al. (U.S. 6,006,486) are moot based on grounds of new rejection.

Applicant's arguments regarding the rejection made under 35 U.S.C. 103(a) as being unpatentable over Moriau et al. (U.S. 6,006,486) in view of Clausi (U.S. 5,855,832) are moot based on grounds of new rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence Ferguson whose telephone number is 571-272-1522. The examiner can normally be reached on Monday through Friday 9:00 AM – 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jennifer McNeil, can be reached on 571-272-1540. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
